

Hotel Reservation Analysis Report

1. Executive Summary

This report presents key insights derived from the **Hotel Reservation Analysis Dashboard** developed using **Power BI**. The analysis focuses on hotel booking performance, cancellation trends, pricing patterns, and customer behavior. The dashboard enables hotel management to make data-driven decisions by monitoring key performance indicators, identifying cancellation factors, evaluating pricing strategies, and understanding customer segments. The findings help improve operational efficiency, maximize revenue, reduce booking cancellations, and enhance customer satisfaction.

2. Key Insights

2.1 Booking Performance Insights

- Total bookings provide an overview of the hotel's reservation activity.
 - Monthly booking trends help identify seasonal demand patterns.
 - Certain months experience higher booking volumes, indicating peak travel seasons.
 - Market segment analysis shows which customer groups contribute the highest number of bookings.
 - Monitoring booking trends supports better resource planning and staffing decisions.
-

2.2 Cancellation Insights

- Booking cancellations vary across different market segments.
 - Reservations made with longer lead times tend to have a higher likelihood of cancellation.
 - Certain room types experience higher cancellation rates than others.
 - Meal plans also influence cancellation behavior.
 - Understanding these patterns enables the hotel to develop strategies that reduce cancellations and improve occupancy.
-

2.3 Revenue and Pricing Insights

- Average Room Price (ADR) varies across room categories.
 - Pricing trends change throughout the year based on customer demand.
 - Higher-priced rooms contribute significantly to overall revenue.
 - Comparing room prices with cancellation rates helps determine whether pricing influences customer decisions.
 - Optimizing pricing strategies can improve both occupancy and revenue.
-

2.4 Customer Insights

- The dashboard distinguishes between repeat and new guests.
 - Repeat guests represent customer loyalty and contribute to long-term business growth.
 - Guest composition analysis provides insights into the number of adults, children, and infants per booking.
 - Customer segmentation helps identify different travel behaviors and preferences.
 - These insights support personalized marketing and customer retention programs.
-

2.5 Operational Insights

- Average lead time helps measure how far in advance customers make reservations.
 - Market segment analysis identifies the hotel's primary sources of bookings.
 - Interactive filters enable managers to analyze performance across different years, months, room types, and meal plans.
 - Monitoring operational KPIs helps management make timely and informed decisions.
-

3. Business Recommendations

- Develop targeted marketing campaigns for market segments with the highest booking potential.
- Introduce flexible booking and cancellation policies to reduce cancellation rates.
- Optimize room pricing during peak and off-peak seasons using demand-based pricing strategies.
- Reward repeat guests through loyalty programs and personalized offers.
- Promote room categories with lower occupancy through special discounts and promotional packages.

- Use booking trend analysis to improve staffing, inventory management, and resource allocation.
 - Continuously monitor dashboard KPIs to support strategic decision-making and improve business performance.
-

4. Conclusion

The **Hotel Reservation Analysis Dashboard** provides a comprehensive overview of hotel booking performance, customer behavior, cancellation trends, and pricing strategies. By combining interactive visualizations with key performance indicators, the dashboard enables hotel management to identify business opportunities, improve customer retention, optimize pricing decisions, and reduce booking cancellations. Overall, the project demonstrates how **Power BI** can transform hotel reservation data into actionable insights that support efficient operations and data-driven decision-making.
